Katelin Hoskins, PhD, MBE, CRNP is an Assistant Professor of Nursing at the University of Pennsylvania School of Nursing, and Stephen Bonett, PhD, RN is an Assistant Professor of Nursing at the University of Pennsylvania School of Nursing. This talk will focus on the use of theories, models, and frameworks within implementation science with an emphasis on health equity. We will provide guidance on how to select a framework based on investigators' research questions and goals. We will provide a worked use case and pose key questions with which the field is currently grappling. The talk is geared toward early-stage investigators who are interested in learning more about implementation science. Click [here](#) to register.

- **Virtual Training: 9th Annual Penn Implementation Science Institute. June 24-27, 2025 from 12-5pm EST**

The Penn Implementation Science Institute (ISI) aims to provide participants with the tools to design and execute rigorous implementation science research. ISI will give participants an introduction to the foundations of implementation science (i.e., terminology, conceptual models and frameworks, study design), in-depth understanding on how principles of implementation science can be applied to practical implementation efforts, an overview of advanced topics including implementation strategies and sustainability, and a reading list of seminal papers in implementation science. Additionally, participants will receive hands-on experience sessions led by ISI speakers + staff in grant writing, skill development, and writing specific aims for implementation science grants.
