Implementation science focuses on improving the reach and uptake of patient and community biomedical and behavioral intentions. A growing number of funding agencies are integrating implementation research into their request for proposals, including VA, NIH, AHRQ, CDC, and PCORI. This lecture series is targeted toward health sciences researchers new to the field of implementation science with the goal of growing our implementation research capacity across the University and local VA research enterprise.

December 10, 2020 @ 1 p.m.
Introduction to Implementation Science: Part I

Heather Schacht Reisinger, PhD
Associate Director for Engagement, Integration and Implementation Core, ICTS
Associate Professor, Division of General Internal Medicine
Core Investigator, CADRE

January 28, 2021 @ 1 p.m.
Introduction to Implementation Science: Part II

Heather Schacht Reisinger, PhD
Associate Director for Engagement, Integration and Implementation Core, ICTS
Associate Professor, Division of General Internal Medicine
Core Investigator, CADRE

February 25, 2021 @ 1 p.m.
The Iowa Model and the Iowa Implementation Sustainability Framework: Exploring Research Applications

Kirsten Hanrahan, DNP, ARNP, CONP-PC, FAAN
Director, Nursing Evidence-based Practice and Research Office, University of Iowa Healthcare
Laura Cullen, DNP, RN, FAAN
Evidence-based Practice Scientist, Nursing Evidence-based Practice and Research Office, University of Iowa Healthcare
Stephanie Edmond, PhD, MPH, RN
Nurse Scientist, Nursing Evidence-based Practice and Research Office, University of Iowa Healthcare

March 25, 2021 @ 1 p.m.
Tracking Implementation Strategies

Cassie Goedken, MPH
Implementation Specialist, CADRE

April 22, 2021 @ 1 p.m.
Ethnography and Implementation Science

Elissa Faro, PhD
Assistant Professor, Division of General Internal Medicine
