IOWA PERSONAL HEALTH RECORD (PHR)

An integrated web application for deploying and managing interactive research studies with adult participants.
ONBOARDING YOUR PROJECT IN IOWA PHR

- Consultation
- Specifications
- Timeline & Cost Estimate
- Development, Testing & Go-Live
Objective: Gather project information to assess whether Iowa PHR it is a good fit for your planned work.

- In person or online review of high-level questions such as:
  - What kinds of users do you want to have access to Iowa PHR?
  - What is the timeline for your study?
  - Are there forms or instruments that need to be completed in the app?
  - What stage of development is your project in (e.g., feasibility/proposal, funded)?

- Consideration of alternatives
Objective: Understand your project's detailed user needs, including user roles and functionality, case tracking, and data access.

- Review of detailed configuration settings like:
  - Do you have a study logo you want included in the app?
  - Do you need a study-specific website?
  - Do you need a native (mobile) version of the app?
  - What kinds of reports or data views are needed?
    - Who? How often?
  - What forms or instruments do you need implemented in Iowa PHR?
    - Who needs to complete them and when?
    - Are there events that you want triggered (like an email notification) upon submission of a form?

Once completed, proceed to Timeline & Cost Estimate phase
ONBOARDING YOUR PROJECT (3 OF 4)

Objective: Provide a description and estimate of the timeline and costs to develop, test, implement, and support your Iowa PHR instance for the duration of your study.

• Costs can vary widely due to specific project needs.

• In general, our team will work to provide you with a cost estimate and timeline within 7 business days from the discussion of project specifications.

Once the scope of work and timeline are agreed to, proceed to Development, Testing & Go-Live phase.
ONBOARDING YOUR PROJECT (4 OF 4)

Objective: Develop, test and implement your Iowa PHR instance.

• Our team will consult with you to ensure the app meets your expectations in the agreed-upon timeline.

• Move to production environment, go-live, issue accounts.

• Monitor app activity and address emergent issues.

To schedule a free consultation please submit a request.
