

# TriNetX

TRINETX AT UNIVERSITY OF IOWA HEALTHCARE PROVIDES RESEARCHERS THE ABILITY TO EXPLORE A LIMITED, DE-IDENTIFIED SET OF PATIENT DATA. THIS TOOL IS MOST USEFUL FOR IDENTIFICATION OF PATIENT COHORTS FOR PREPARATION TO RESEARCH.

TriNetX is the global health research network enabling healthcare organizations, biopharma and contract research organizations (CROs) to collaborate, enhance trial design, accelerate recruitment and bring new therapies to market faster.

## TriNetX FEATURES

- EASY TO USE**  
Intuitive design
- RESEARCHER**  
Principal investigators at healthcare organizations can research their own patient populations
- REAL-TIME**  
Scenario modeling for protocol feasibility
- PHI**  
All PHI remains local
- PRE-QUALIFIED**  
Patient lists
- SELF-SERVICE**  
Access to fresh patient data

- PREDICTIVE ANALYTICS**  
To project rates at which new patients match eligibility criteria
- SECURE**  
Compliant with international privacy regulations
- NETWORK**  
Healthcare organizations can form collaborative networks with peer institutions and research the patient population of all collaborators
- INDUSTRIAL SPONSOR**  
Attract more industry-sponsored trials
